

# Project Acme: Operational Due Diligence - Technology & Security

## 1. Technical Infrastructure

The platform is hosted on AWS using a microservices architecture (Node.js/Python). Databases include PostgreSQL for transactional data and Snowflake for analytics.

## 2. Cybersecurity Profile

The company is SOC-2 Type II compliant. Recent penetration tests showed no critical vulnerabilities. Backup and disaster recovery RPO/RTO meet enterprise standards.

| Service   | Provider   | Region    | Uptime SLA |
|-----------|------------|-----------|------------|
| Hosting   | AWS        | US-East-1 | 99.99%     |
| Analytics | Snowflake  | US-West-2 | 99.9%      |
| CDN       | Cloudflare | Global    | 100.0%     |
